

National Payment Schemes

Applus+ Laboratories is accredited to provide comprehensive security evaluation services for payment solutions based on **various global and domestic standards**, including **PURE, NAPAS, EFTPOS** amongst others.

Our expertise ensures your payment solutions meet the **stringent security and operational requirements** of these certification schemes, facilitating a smooth and efficient path to market readiness.

PURE Standard Certification Services

PURE, developed by Thales DIS France SAS, is a **fully EMV™-compliant payment application** designed for domestic schemes and private payment card associations. It is widely used in different countries as a local payment scheme. Our services for PURE include:

- **PURE IC Card Products:** Security evaluations for dual-interface and contact cards.

NAPAS Certification Services (Vietnam)

NAPAS, the **National Payment Corporation of Vietnam**, has developed the Vietnam Chip Card Standards (VCCS) to **standardize domestic chip payment cards**. Our services for NAPAS include:

- **VCCS Card Security Evaluation**

EFTPOS Certification Services (Australia)

EFTPOS is Australia's domestic debit network offering innovative payment solutions. Our services for EFTPOS include:

- **EFTPOS Card Products:** Security evaluations for dual-interface and contact cards.

TROY (Turkey) and ELO (Brazil) Certification Services

TROY is Turkey's domestic card scheme, and ELO the Brazilian payment brand. Both schemes **signed partnerships with Discover Global Network**. In terms of certification this means that they leverage on Discover specifications and follow Discover's certification process. As a Discover accredited lab, we can perform:

Discover's Security and Functional evaluations for dual interface cards and terminals, accepted by TROY and ELO.

Why Choose Applus+ Laboratories?

By partnering with [Applus+ Laboratories](#), clients can **ensure their payment solutions** meet the stringent security standards set by **PURE, NAPAS, EFTPOS, TROY and ELO certification schemes**, facilitating market readiness and global interoperability.
